**General Instruction: -**

1. Teaching work load shall be One period for one Credit per week each theory paper.
2. Practical work load shall be Two period for one Credit per batch per week each practical paper.
3. Strength of students for each practical batch shall not be more than 20.
4. Students shall not be allowed for practical Examination without certified journal.
5. Total periods for each theory paper shall be 30/semester.
6. Total Periods for Practical paper shall be 60/semester.
7. There should be Continuous Internal Evaluation (CIE) for each paper e.g. Test, tutorials, Seminars and Home Assignments etc.

**Bachelor of Arts**  
**B.A.S.Y. (Semester-III)**  
**Subject -Geography**  
**Course Code – GT-DSC -VIII**  
**Title of Course- Population Geography**

**Total Credit: 02**

**Total Contact Hours: 30 Hrs.**

**Maximum Marks: 50**

**Learning Objectives of the Course:**

By the end of this course, students will be able to:

- I. Learn its definition, scope, and significance in geography.
- II. Explore sources of population data and factors affecting population distribution and density.
- III. Study population growth, its causes, effects, and concepts like optimum and overpopulation.
- IV. Understand how population growth affects resources, climate, and urbanization.
- V. Learn about India's population policies and their role in managing demographic challenges

**Course Outcomes (COs):**

After the completion of course, the students will have ability to:

- I. Students will be able to define population geography, understand its nature, and delineate its scope within the broader field of geography.
- II. Students will assess physical, socio-cultural, and demographic factors influencing population distribution and density.
- III. Students will comprehend these concepts and their implications for resource use and sustainability.
- IV. Students will recognize key issues at the intersection of population growth and human well-being.

**Bachelor of Arts**  
**B.A.S.Y. (Semester-III)**  
**Subject -Geography**  
**Course Code – GP-DSC -VIII**  
**Title of Course- Population Geography Practical**

**Total Credit: 02**

**Total Contact Hours: 60 Hrs.**

**Maximum Marks: 50**

**Learning Objectives of the Course:**

- i. Learn to calculate arithmetic, agricultural, and nutritional density using real-world data.
- ii. Compute and interpret net population growth and growth rates.
- iii. Develop skills in making quantitative and qualitative maps.
- iv. Practice drawing bar graph maps, proportional circles, squares, and spheres.
- v. Learn to read and analyze different types of population distribution maps effectively.

**Course Outcomes (COs):**

- i. **Apply Population Density Measures** – Accurately calculate and interpret arithmetic, agricultural, and nutritional density.
- ii. **Analyze Population Growth Trends** – Compute net population growth and growth rates using demographic data.
- iii. **Construct Various Distributional Maps** – Create and present quantitative and qualitative maps for population studies.
- iv. **Demonstrate Diagrammatic Mapping Skills** – Effectively use bar graphs, proportional circles, squares, and spheres to visualize population data.
- v. **Interpret and Evaluate Map-Based Data** – Analyze and draw conclusions from different population distribution maps.

**Bachelor of Arts**  
**B.A.S.Y. (Semester-III)**  
**Subject -Geography**  
**Course Code – GT.M -I**  
**Title of the Course- Geography of Marathwada**

**Total Credit: 02**

**Total Contact Hours: 30 Hrs.**

**Maximum Marks: 50**

**Learning Objectives of the Course:**

1. To acquaint students with Geography of our Region.
2. To make students aware of the magnitude of problems and prospects in the region.
3. To help students understand the recent trends in regional studies.

**Course Outcomes (COs):**

After the completion of course, the students will have ability to:

1. Describe the Physical Setting of Marathwada.
2. Describe the Climate characteristics of Marathwada.
3. Explain the agriculture and Industries development of Marathwada

**B. A. S. Y. (Semester-III)**  
**Subject -Geography**  
**M2: - General Geography (Theory)**

**Total Credits: 02**  
**Total Contact Hours:30**  
**Maximum Marks: 50**

**Learning Objectives of the Course:**

1. Understand the meaning, definition, scope, and branches of Geography.
2. Learn fundamental concepts in Physical Geography, including latitudes, longitudes, and Earth measurements.
3. Explore key aspects of Human Geography, such as population dynamics, economic activities, and human settlements.

**Course Outcomes (Cos):**

After completion of the course, students will be able to-

1. Explain the fundamental principles and scope of Geography and its branches.
2. Analyze geographical coordinates, grid systems, and Earth measurements for spatial understanding.
3. Evaluate human population patterns, economic activities, and settlement systems in relation to geography.

**Bachelor of Arts  
B.A.S.Y. (Semester-III)  
Subject -Geography  
Course Code-GT.GE/OE-III**

**Title of the Course- World Heritage Center in Maharashtra**

**Total Credit: 02**

**Total Contact Hours: 30 Hrs.**

**Maximum Marks: 50**

**Learning Objectives of the Course:**

- I. Define and explain the meaning and historical background of cultural heritage.
- II. Explore key concepts, characteristics, and types of Indian cultural heritage.
- III. Examine the historical context and significance of these heritage sites.
- IV. Assess the biodiversity and conservation value of these heritage sites.
- V. Evaluate tourism management strategies and sustainable tourism practices.

**Course Outcomes (COs):**

After the completion of course, the students will have ability to:

- I. Appreciate Historical heritage and tourist destinations
- II. Critically appreciate the heritage site
- III. Adopt the art of documenting the heritage site
- IV. Analyze the basic character of heritage

**Bachelor of Arts**  
**BASY Semester -III**  
**Subject: -Geography**  
**Course Code – GT -VSC- 2**  
**Title of Course- IMD Theory**

**Total Credit: 01**

**Total Contact Hours: 30 Hrs.**

**Maximum Marks: 50**

**Learning Objectives of the Course:**

- I. Understand the role of the Indian Meteorological Department (IMD) and its significance in weather forecasting and disaster management.
- II. Identify and interpret key weather elements such as temperature, humidity, air pressure, wind speed, rainfall, and cloud cover.
- III. Analyze IMD weather reports and synoptic charts, understanding symbols, notations, and meteorological data representation.
- IV. Use weather instruments and modern technology. (e.g., satellites and radar) for data collection and weather monitoring.
- V. Prepare a structured weather report, including observations, graphical representations, and conclusions based on real-time data.

**Course Outcomes (COs):**

After the completion of course, the students will have ability to:

- I. Explain the functions of the Indian Meteorological Department (IMD) and the importance of weather forecasting in various sectors.
- II. Interpret key meteorological parameters such as temperature, humidity, air pressure, wind speed, and precipitation using IMD reports.
- III. Analyze synoptic weather charts and satellite imagery to identify weather patterns, pressure systems, and wind directions.
- IV. Demonstrate the use of weather instruments (e.g., thermometer, barometer, anemometer, rain gauge) and modern technologies for weather monitoring.
- V. Prepare a structured weather report with graphical data representation, observations, and conclusions based on IMD weather data.

**Bachelor of Arts**  
**BASY Semester -III**  
**Subject: Geography**  
**Course Code – GP -VSC- 2**  
**Title of Course- IMD Practical**

**Total Credit: 01**  
**Total Contact Hours: 60 Hrs.**  
**Maximum Marks: 50**

**Learning Objectives of the Course:**

- I. Understand the role of the Indian Meteorological Department (IMD) and its significance in weather forecasting and disaster management.
- II. Identify and interpret key weather elements such as temperature, humidity, air pressure, wind speed, rainfall, and cloud cover.
- III. Analyze IMD weather reports and synoptic charts, understanding symbols, notations, and meteorological data representation.
- IV. Use weather instruments and modern technology. (e.g., satellites and radar) for data collection and weather monitoring.
- V. Prepare a structured weather report, including observations, graphical representations, and conclusions based on real-time data.

**Course Outcomes (COs):**

After the completion of course, the students will have ability to:

- I. Explain the functions of the Indian Meteorological Department (IMD) and the importance of weather forecasting in various sectors.
- II. Interpret key meteorological parameters such as temperature, humidity, air pressure, wind speed, and precipitation using IMD reports.
- III. Analyze synoptic weather charts and satellite imagery to identify weather patterns, pressure systems, and wind directions.
- IV. Demonstrate the use of weather instruments (e.g., thermometer, barometer, anemometer, rain gauge) and modern technologies for weather monitoring.
- V. Prepare a structured weather report with graphical data representation, observations, and conclusions based on IMD weather data.

**B.A.S.Y. (Semester-IV)**  
**Subject -Geography**  
**DSC 9 :- Climatology-II (Theory)**

**Total Credits: 02**  
**Total Contact Hours:30**  
**Maximum Marks: 50**

**Learning Objectives of the Course:**

1. To understand the definition, scope, and importance of applied climatology.
2. To analyze the impact of climate on agriculture and crop suitability.
3. To study the relationship between climate and human health, including diseases and risks.
4. To examine the role of climate in natural disasters and disaster management.
5. To explore adaptive strategies for health and disaster risk reduction.

**Course Outcomes (Cos):**

After completion of the course, students will be able to-

1. Explain the concept and significance of applied climatology.
2. Identify the effects of climate on agriculture and different agro-climatic zones.
3. Assess climate-related health issues and strategies for protection.
4. Analyze the role of climate in disasters and mitigation measures.
5. Apply knowledge of climate risk assessment and disaster preparedness.

**B.A.S.Y. (Semester-IV)**  
**Subject -Geography**  
**DSC 9 :- Climatology-II (Practical)**

**Total Credits: 02**

**Total Contact Hours:60**

**Maximum Marks: 50**

**Learning Objectives of the Course:**

1. To understand methods of measuring temperature and humidity.
2. To analyze rainfall patterns and their impact on the environment.
3. To learn techniques for collecting and interpreting climate data.
4. To develop skills in graphical representation of weather data.
5. To assess climate variability and its effects on agriculture and water resources.

**Course Outcomes (Cos):**

After completion of the course, students will be able to-

1. Measure and analyze temperature variations using thermometers.
2. Calculate and interpret humidity levels using hygrometers and psychrometric tables.
3. Collect and assess rainfall data using rain gauges and statistical methods.
4. Represent climate data through graphs and analyze trends.
5. Apply climate data analysis for understanding environmental and agricultural impacts.

**B.A.S.Y. (Semester-IV)**  
**Subject -Geography**  
**DSC10 :- Demography (Theory)**

**Total Credits: 2**

**Total Contact Hours:30**

**Maximum Marks: 50**

**Learning Objectives of the Course:**

1. Learn the definition, scope, and importance of demography.
2. Explore factors affecting sex ratio, age structure, and literacy.
3. Understand fertility, mortality, and migration and their impacts.
4. Study key theories by Malthus, Marx, Ricardo, and the Demographic Transition Theory.
5. Examine how population changes influence society and the economy.

**Course Outcomes (Cos):**

After completion of the course, students will be able to-

1. Define and explain the scope and significance of demography, including key concepts such as population, fertility, mortality, and migration.
2. Examine the factors influencing sex and age composition, economic composition, and literacy rates, with a focus on India's demographic structure.
3. Evaluate measures of fertility and mortality, their determinants, and trends in India, along with the impact of migration on population dynamics.
4. Understand and critically assess major population theories, including the Demographic Transition Theory, and perspectives of Malthus, Marx, and Ricardo.
5. Analyze how demographic changes impact economic development, resource distribution, and policy-making, particularly in the Indian context

| Module No. | Topic                                                                                                                                                                                                                                                                                                                                           | Contact Hours |

**B.A.S.Y. (Semester-IV)**  
**Subject -Geography**  
**DSC10 :- Demography- (practical)**

**Total Credits: 2**

**Total Contact Hours:60**

**Maximum Marks: 50**

**Learning Objectives of the Course:**

1. To understand key population characteristics like age, sex, fertility, and mortality.
2. To analyze population indices such as dependency ratio and age-specific mortality.
3. To learn different methods of representing population data visually.
4. To interpret demographic trends using statistical and graphical tools.
5. To assess population distribution and its impact on society and development.

**Course Outcomes (Cos):**

After completion of the course, students will be able to-

1. Explain population characteristics and their significance in demographic studies.
2. Calculate and interpret population indices like child-woman ratio and dependency ratio.
3. Represent population data using dot maps, choropleth maps, and isopleth maps.
4. Analyze demographic trends through graphical methods.
5. Apply population data analysis for planning and policy-making.

**B.A.S.Y. (Semester-IV)**  
**Subject -Geography**  
**M4:- Tourism Geography (Theory)**

**Total Credits: 02**

**Total Contact Hours:30**

**Maximum Marks: 50**

**Learning Objectives of the Course:**

1. Define and explore the nature, scope, and significance of tourism geography, including natural and cultural perspectives.
2. Examine nature-based tourism, cultural and heritage tourism, and urban tourism dynamics.
3. Study the major tourism destinations, World Heritage Sites, and tourism infrastructure, along with the challenges and government policies.
4. Investigate the region's World Heritage Sites, natural and cultural tourism facilities, and their role in regional tourism growth.

**Course Outcomes (Cos):**

After completion of the course, students will be able to-

1. Understand the fundamental concepts, nature, and scope of tourism geography and its interdisciplinary connections.
2. Explore the diversity of tourism in India, with a focus on World Heritage sites and their significance.
3. Evaluate the infrastructure development and challenges in the Indian tourism sector.
4. Understand the significance of Geographical Indication (GI) goods in Marathwada and their impact on tourism.

| Module No. | Topic                                                                                                                                                                                                       | Contact Hours |

**B.A.S.Y. (Semester-IV)**  
**Subject -Geography**  
**GE/OE 3:- Introduction of Indian Monsoon (Theory)**

**Total Credits: 02**  
**Total Contact Hours:30**  
**Maximum Marks: 50**

**Learning Objectives of the Course**

- i) Students will be able to define the monsoon and explain the dynamic atmospheric mechanisms that drive its formation.
- ii) Students will be able to identify and analyze the various geographical and meteorological factors that influence the onset, intensity, and duration of the monsoon.
- iii) Students will be able to distinguish between the Southwest and Northwest monsoons, outlining their characteristics and regional significance.
- iv) Students will be able to evaluate the influence of the monsoon on Indian agriculture, including crop production and irrigation.
- v) Students will be able to discuss the methods used for monsoon prediction and explore strategies for effective monsoon management.

**Course Outcomes (COs)**

1. Students will be able to define the monsoon, explain its underlying atmospheric mechanisms, and analyze the factors influencing its onset and variability.
2. Students will be able to distinguish between the Southwest and Northwest monsoons, outlining their characteristics and regional significance.
3. Students will be able to define monsoon variability, identify the factors that contribute to its fluctuations, and assess its environmental and socioeconomic impacts.
4. Students will be able to describe and analyze the unique features of the Indian monsoon, including its variability and regional impacts.
5. Students will be able to evaluate the influence of the monsoon on Indian agriculture, including crop production and irrigation systems.

| Module No. | Topic                                                                                                                                                                                                                                                            | Contact Hours |

**B.A.S.Y. (Semester-IV)**  
**Subject -Geography**  
**SEC2:- Instrumental Survey (Theory)**

**Total Credits: 01**  
**Total Contact Hours:30**  
**Maximum Marks: 50**

**Learning Objectives of the Course**

1. Students will be able to define surveying and explain its fundamental purpose in determining the relative positions of points on the Earth's surface.
2. Students will be able to describe and compare various surveying methods, including triangulation, leveling, and plane table surveying.
3. Students will be able to explain how surveying contributes to geographical studies, particularly in mapping, spatial analysis, and land management.
4. Students will be able to convert area measurements between various units.
5. Students will be able to evaluate the merits and demerits of prismatic compass surveying in various geographical contexts.

**Course Outcomes (COs)**

1. Students will be able to define surveying, differentiate between its various types (plane vs. geodetic), and classify surveys based on their purpose, demonstrating a foundational understanding of surveying principles.
2. Students will be able to articulate the importance of surveying in geographical analysis, including its role in mapping, spatial data collection, and land management.
3. Students will be able to set up and operate a plane table, including the use of associated instruments, to create accurate maps and plans.
4. Students will be able to perform accurate area conversions between various units
5. Students will be able to critically evaluate the merits and demerits of prismatic compass surveying, considering its suitability for various geographical contexts.

| Module No. | Topic                                                                                                                                                                                                                                                                                                                                    | Contact Hours |

**B.A.S.Y. (Semester-IV)**  
**Subject -Geography**  
**SEC2:- Instrumental Survey (Practical)**

**Total Credits: 01**  
**Total Contact Hours:60**  
**Maximum Marks: 50**

**Learning Objectives of the Course**

- i) Understand the basic principles, methods and types of surveying.
- ii) Gain knowledge of traditional and modern surveying instruments.
- iii) Understand the role of surveying in cartography, land-use planning, and environmental management.
- iv) Conduct real-world surveying projects and case studies.

**Course Outcomes (COs)**

1. Students Understanding Surveying Fundamentals.
2. Student able to Application of Surveying Methods
3. Student are Operation of Surveying Instruments
4. Student able to Data Collection and Mapping Skills
5. Practical Problem-Solving in Surveying.

**B.A.S.Y. (Semester-IV)**  
**Subject -Geography**  
**CEP-FP-1 :- Field Project/ Study Tour**

**Total Credits: 2**

**Total Contact Hours:60**

**Maximum Marks: 50**

**Learning Objectives of the Course:**

1. Students will be able to accurately observe, record, and collect geographical data using appropriate field techniques and instruments.
2. Students will be able to analyze spatial patterns and relationships within the study area, using maps, graphs, and other visual representations.
3. Students will be able to apply critical thinking skills to analyze geographical problems and propose potential solutions.
4. Students will be able to interpret geographical phenomena and processes observed in the field, relating them to relevant theoretical concepts.
5. Students will be able to effectively communicate their findings through written reports, presentations, and other forms of media.

**Course Outcomes (Cos):**

After completion of the course, students will be able to-

1. Students will be able to accurately collect and record geographical data using appropriate field techniques and instruments.
2. Students will be able to analyze and interpret spatial data to identify patterns and relationships, creating maps, graphs, and other visual representations.
3. Students will be able to analyze the socioeconomic characteristics of a study area, including demographics, land use, and economic activities, and present findings in a clear and concise manner.
4. Students will be able to critically analyze geographical problems encountered in the field and propose evidence-based solutions.
5. Students will be able to apply classroom geographical theory to real world scenarios encountered while in the field.

**Field Project/ Study Tour**

- Suitable title of the project.
- Introduction
- Study Area
- Significance of the problem
- Objectives of the research
- Research methodology
- Collection of primary / secondary data
- Relevant statistical techniques
- Maps, Graphs, Diagrams & Photos, Analysis
- Interpretation and Report Writing
- Relevant statistical techniques, Maps, Graphs, Diagrams & Photos, Analysis
- Chapter Scheme
- Interpretation and Report Writing
- Viva-voce and presentation.

**General Instruction:-**

1. Teaching work load shall be One period for one Credit per week each theory paper.
2. Practical work load shall be Two period for one Credit per batch per week each practical paper.
3. Strength of students for each practical batch shall not be more than 20.
4. Students shall not be allowed for practical Examination without certified journal.
5. Total periods for each theory paper shall be 30 Hours per semester.
6. Total Periods for Practical paper shall be 60 Hours per semester.
7. There should be Continuous Internal Evaluation (CIE) for each paper e.g. Test, tutorials, Seminars and Home Assignments etc.

**Bachelor of Arts**  
**B.A. First Year Semester -I**  
**Subject: - Geography**  
**Course Code-GT-DSC-1**  
**Title of Course- Physical Geography**

**Total Credit: 02**

**Total Contact Hours: 30 Hrs.**

**Maximum Marks: 50**

**Course Objectives:**

1. Student will gain the knowledge of Physical Geography.
2. Student will have a general understanding about the geomorphological process and formation.
3. Student will be able to correlate the knowledge of Physical Geography with the human activities.

**Course Outcomes:**

1. Students will know the basic concept in Physical Geography.
2. Understand earth's tectonic and structural evolution.
3. Gain knowledge about earth's interior and various theories regarding earth.
4. Acquire knowledge about types of folds and faults and earthquakes, volcanoes and rocks classification.

**Course Contents:**

| Module No. | Topics/actual contents of the syllabus                                                                                                                                                                                                                       | Contact Hours |

Notes: - 10 Students prepare the survey report.

A group of 10 students may work on same topic under the guidance of teacher.

**Bachelor of Arts**  
**B.A. First Year Semester -II**  
**Subject: - Geography**  
**Course Code: - GP-VSC-1**

**Title of Course: Socio-Economic Survey (Practical)**

**Total Credit: 02**

**Total Contact Hours: 60 Hrs.**

**Maximum Marks: 50**

**Learning Objectives of the Course:**

1. To know the methods of Socio-Economic Survey.
2. To understand the type of statistical data.
3. To make enable for report writing.

**Course Outcomes (COs):**

After the completion of course, the students will have ability to:

1. Understanding of Socio-Economic condition.
2. Recognize the social & economic situation of the village.
3. Enhance the ability of collecting data.
4. Acquire the skill of making questionnaire & report writing.

**Course Contents:**

| <b>Module No.</b> | <b>Topics/actual contents of the syllabus</b>                                                                                                                                                                                                                                                                                                                                                                                                              | <b>Contact Hours</b> |
